1 Type of installation: shaft-mounted 0/180°. Minimal in-between distances authorised.

|  |  |
|--|--|
| Nominal activation conditions/sensitivity:   | Pass - automatic activation  |
| Response delay (response time): closure time | Pass - automatic activation  |
| Operational reliability: cycling             | 300 cycles (no load)   |
| Durability of response delay:                | Pass   |
| Durability of operational reliability:       | Pass   |
| Approved accessories                         | Acrylic paint on the leaf and synthetic paint on the frame on the side not exposed to fire; Glued wall paper on the side not exposed to fire; ATOUT RAL 9010; ATOUT ALU; EASY-KAP or EASY-KGC mounting frame; with or without mastic seal; Anifall device type KGD |
| High operational temperature (HOT 400/30):   | NPD (no performance determined)  |

The performance of the product identified above is in conformity with the set of declared performance/s. This declaration of performance is issued, in accordance with Regulation (EU) No 305/2011, under the sole responsibility of the manufacturer identified above.

Signed for and on behalf of the manufacturer by:  
Mathieu Steenland, Technical Manager

Oosterzele, 11/2019

## Product presentation KAMOUFLAGE

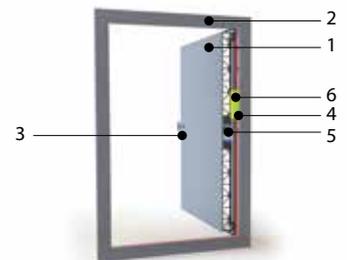

The smoke evacuation shutter Kamouflage is unique through its aesthetic finish, its air-tightness, and its high thermal and acoustic insulation. Its outer face consists of a plasterboard panel enabling a decorative finish to be applied to match the adjacent wall finish. In addition to single and double shutter units (1V/2V) for vertical wall installation, the Kamouflage P model (NT-V14) is suitable for ceiling mounting into the bottom of smoke shafts. Developed in accordance with the European product standard EN 12101-8 and tested according to the EN 1366-10 standard, Kamouflage offers a fire-resistance of 60 or 120 minutes, and ensures a minimal pressure loss.

Smoke evacuation shutters and dampers are suitable for use in ventilating protected lobbies, venting to shafts either naturally or mechanically. They open to evacuate smoke in emergency situations whilst maintaining fire resistant integrity in standby position.

- ☑ aesthetic solution
  - ☑ modern look: either select the ready-to-install product with white laquered or aluminium finish, or cover with paint or wallpaper
  - ☑ superior air tightness (tested at 1500 Pa)
  - ☑ thermal and acoustic insulation
  - ☑ optimal free air passage and minimal pressure loss
  - ☑ 2V model with simplified manual reset (closing)
  - ☑ frame available with primer
  - ☑ integrated blocking mechanism
  - ☑ large dimensions
- tested according to EN 1366-10
  - compliant with EN 12101-8
  - approved for installation in calcium-silicate, 'Staff', Tecniver, Glasroc and concrete shafts
  - maintenance-free
  - for indoor use
  - winner of the French "Janus de l'Industrie" award
  - intermediate dimensions on request
  - reversible (hinges left or right)

1. 1 shutter (1V) / 2 shutters (2V)
2. frame in anodised aluminium (standard or ATOUT ALU) / with primer (PRIM) / white laquered (ATOUT RAL9010)
3. lock + key
4. connection compartment
5. blocking mechanism + automatic locking at 90°
6. product identification

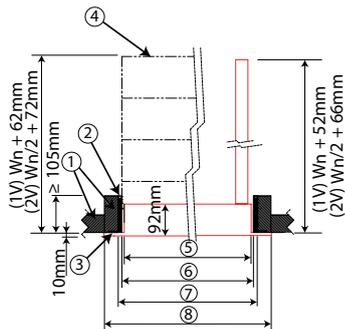

## Range and dimensions

### Variant KAMOUFLAGE 1V60 - 1V120

Kamouflage aesthetic smoke evacuation shutter, single (1V) shutter unit.

- 1 shutter
- fire resistance till 60 minutes / 120 minutes

### Range and dimensions KAMOUFLAGE 1V60 - 1V120

1. Refractory material
2. Sealing if mounting frame
3. Mounting frame (optional)
4. EASY-KGC mounting frame with drop guard (optional)
5. Nominal dimensions shutter  $W_n \times H_n$
6. Built-in dimensions without mounting frame  $(W_n+10) \times (H_n+10)$ mm
7. Built-in dimensions with KAP mounting frame  $(W_n+20) \times (H_n+20)$ mm
8. Overall (outside) dimensions of the shutter  $(W_n+54) \times (H_n+54)$ mm

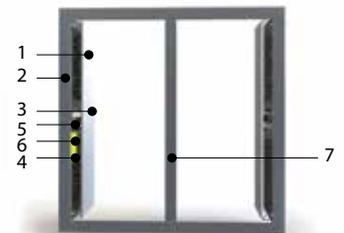

|                          | IV      | IA       |
|--------------------------|---------|----------|
| $(W_n \times H_n)$<br>mm | 300x385 | 700x1075 |

### Variant KAMOUFLAGE 2V60 - 2V120

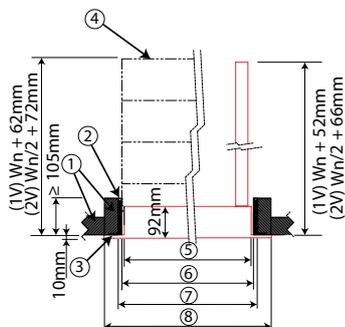

Kamouflage aesthetic smoke evacuation shutter, double (2V) shutter unit.

- 2 shutters
- fire resistance till 60 minutes / 120 minutes

1. 2 shutters (2V)
2. frame in anodised aluminium (standard or ATOUT ALU) / with primer (PRIM) / white laquered (ATOUT RAL9010)
3. lock + key
4. connection compartment
5. blocking mechanism + automatic locking at 90°
6. product identification
7. central support (2V)

### Range and dimensions KAMOUFLAGE 2V60 - 2V120

1. Refractory material
2. Sealing if mounting frame
3. Mounting frame (optional)
4. EASY-KGC mounting frame with drop guard (optional)
5. Nominal dimensions shutter  $W_n \times H_n$
6. Built-in dimensions without mounting frame  $(W_n+10) \times (H_n+10)$ mm
7. Built-in dimensions with KAP mounting frame  $(W_n+20) \times (H_n+20)$ mm
8. Overall (outside) dimensions of the shutter  $(W_n+54) \times (H_n+54)$ mm

|                          | IV      | IA        |
|--------------------------|---------|-----------|
| $(W_n \times H_n)$<br>mm | 350x385 | 1100x1105 |

Evolution - kits

|   |                     |   |
|---|---------------------|---|

## Storage and handling

---

As this product is a safety element, it should be stored and handled with care.

### **Avoid:**

- any kind of impact or damage
- contact with water
- deformation of the casing

### **It is recommended:**

- to unload in a dry area
- not to flip or roll the product to move it
- not to use the damper as a scaffold, working table, etc.
- not to store smaller dampers inside larger ones

## Installation

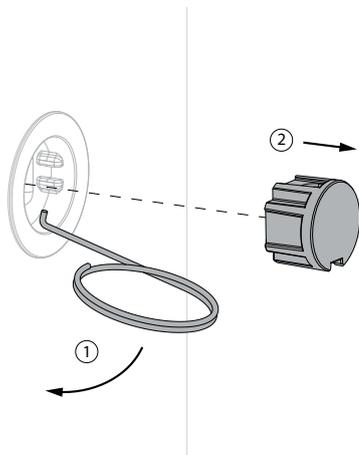

---

### **General points**

- The installation must comply with the installation manual and the classification report.
- The installation of the shaft must comply with the classification report delivered by the shaft manufacturer.
- Axis orientation: see the declaration of performance.
- Avoid the obstruction of adjoining shafts.
- Verify if the blade can move freely.
- Rf-t smoke dampers may be applied to ducts that have been tested according to EN 1366-8 and EN 1366-9 as appropriate, constructed from similar materials with a fire resistance, thickness and density equal or superior to these of the tested materials.
  - ⚠ Caution: when fitting, the product should be handled with care and remain protected from any sealing products.
  - ⚠ Caution: before putting the installation into operation, clean off all the dust and dirt.
  - ⚠ Caution: bear in mind the blade's clearance inside the smoke evacuation duct.

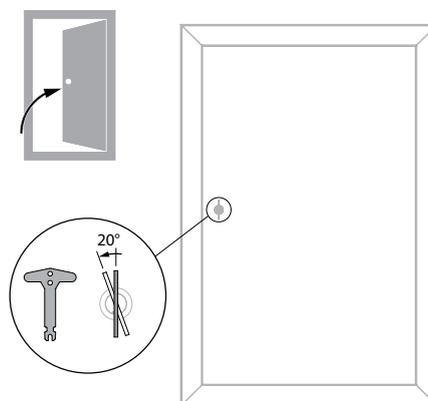

## Operation: manual opening

1

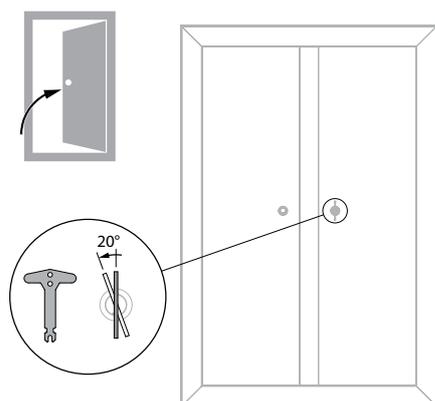

1. Remove the finishing cap from the shutter. To do this, use the hook with key ring that is delivered with the product. You may attach this tool to the key through its handy key ring.

2

2. Unlocking 1V  
Insert the key in the lock. Turn the key 20° anti-clockwise: the shutter opens. Remove the key from the lock.

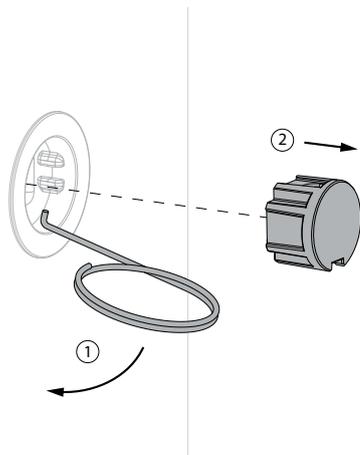

3

3. Unlocking 2V  
Insert the key in the lock. Turn the key 20° anti-clockwise: the shutter opens. Remove the key from the lock.

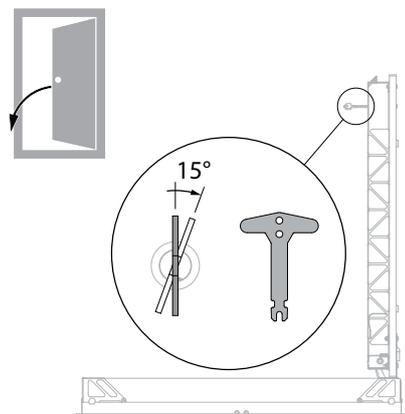

## Operation: manual closing

1

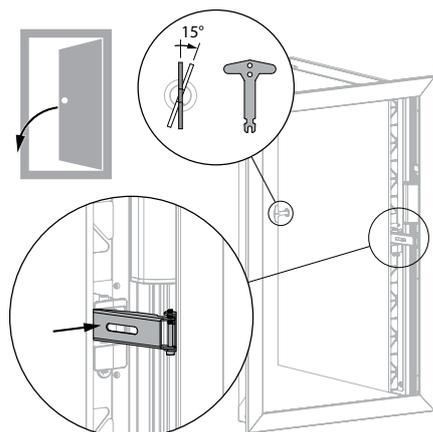

**1. Resetting 1V**  
Remove the finishing cap from the shutter. To do this, use the hook with key ring that is delivered with the product. You may attach this tool to the key through its handy key ring.

2

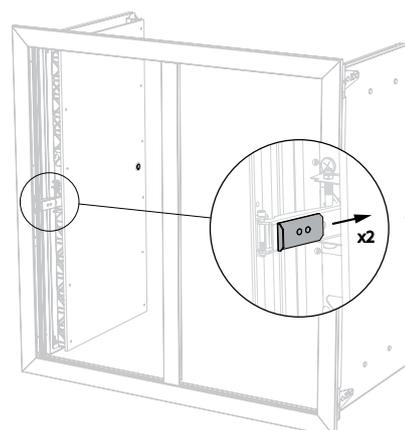

**2. Insert the key in the lock. Turn the key 15° clockwise, the key gets blocked in the lock and can be used to pull the shutter.**

3

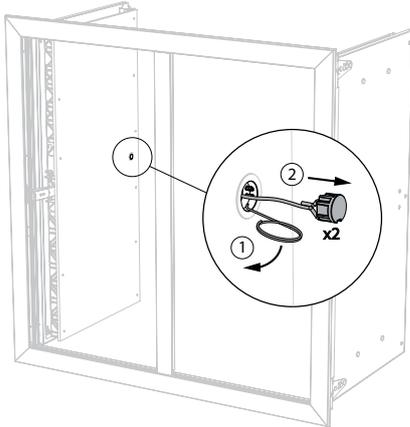

**3. Press on the blocking devices.**  
Close the shutter by pulling at the key.  
Turn the key 15° clockwise, the key unblocks from the lock.  
Withdraw the key.

4

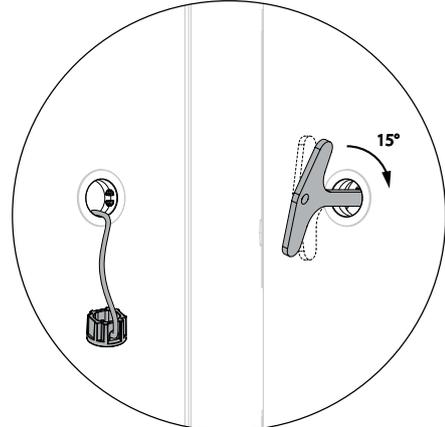

**4. Resetting 2V**  
Press on both blocking devices to deactivate them.

5

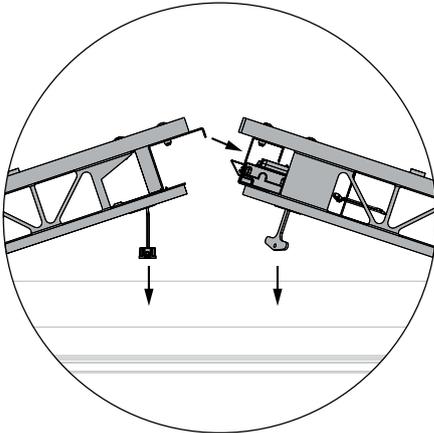

5. Remove the finishing cap from the shutter. To do this, use the hook with key ring that is delivered with the product. You may attach this tool to the key through its handy key ring.

6

6. Insert the key in the lock in the second shutter. Turn the key 15° clockwise, the key gets blocked in the lock and can be used to pull the shutter.

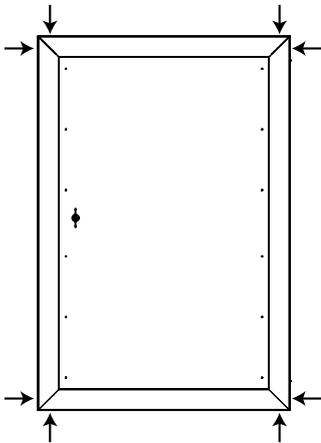

7

7. Pull both shutters towards you with the key and the cord that is attached to the cap. Make sure that the shutters hook in each other as illustrated. Turn the key 15° counter clock wise, the key unblocks from the lock. Withdraw the key and put the finishing caps back in place.

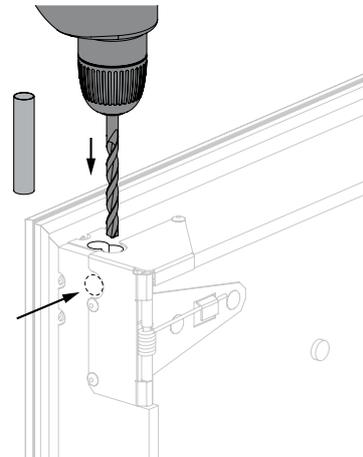

## Electrical connection

1

1. The electrical supply can be done at the 4 corners of the shutter.

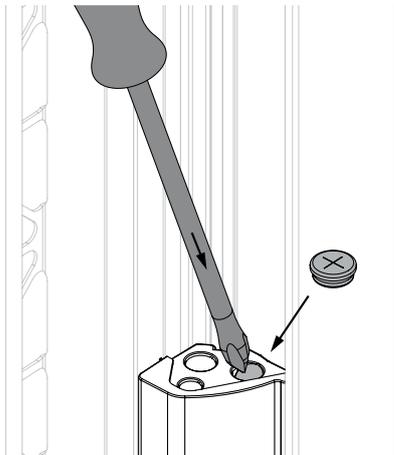

2

2. Drill a hole in the refractory material at the chosen corner(s). The galvanised part at the inside of the shutter is already indented.

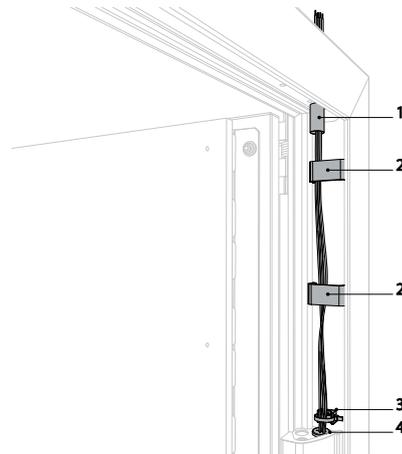

**⚠ Caution:** after passing and fixing the cables, you need to seal the drilled hole in the refractory plates around the electrical cables with fire resistant adhesive sealant (BCM f.e.).

3

3. Pierce an opening in the connection box. Affix the grommet delivered with the product.

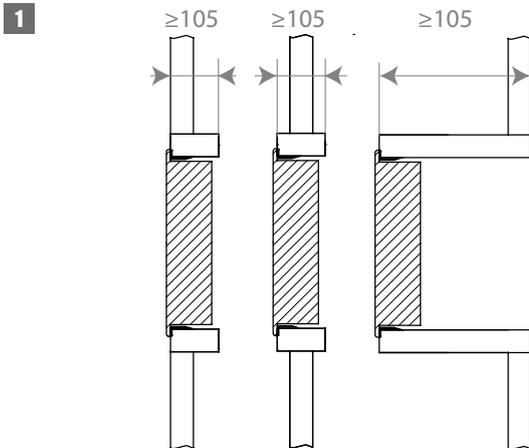

4

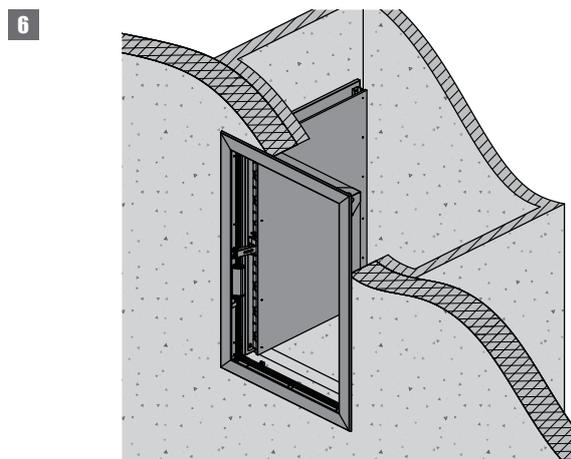

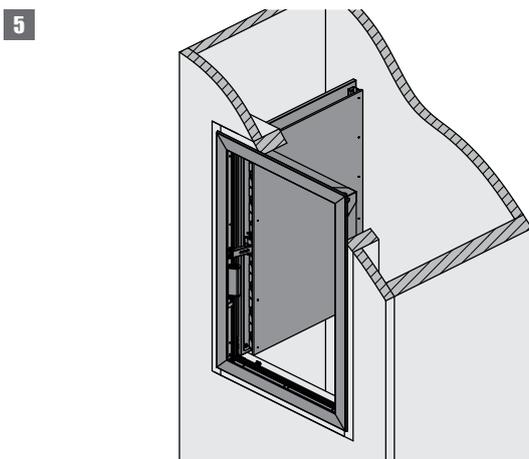

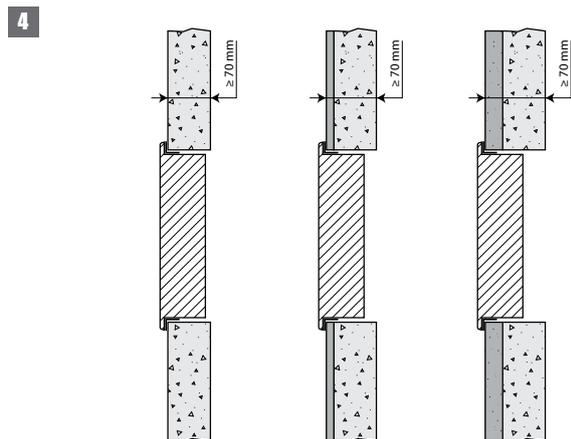

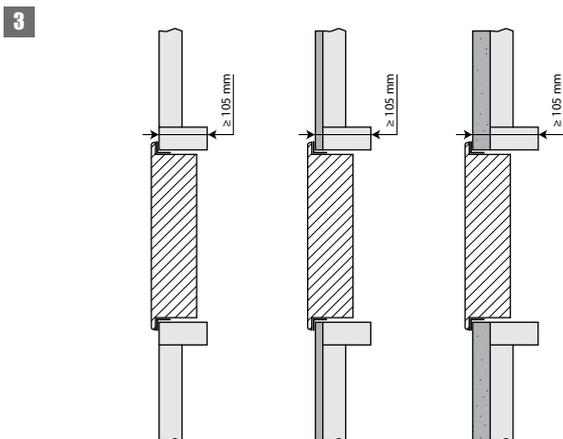

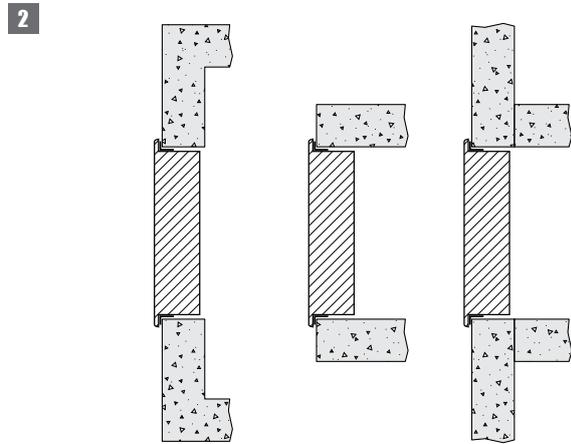

4. Lead the cables through the opening. Use the protective sleeve (1), the fixation clips (2) and the plastic cable clamp (3) to attach the cables to the frame. Lead the cables to the connection box through the grommet (4) and connect according to the electrical connection diagram.

Comply with the installation rules according to article 6.1 of NF S 61-932.

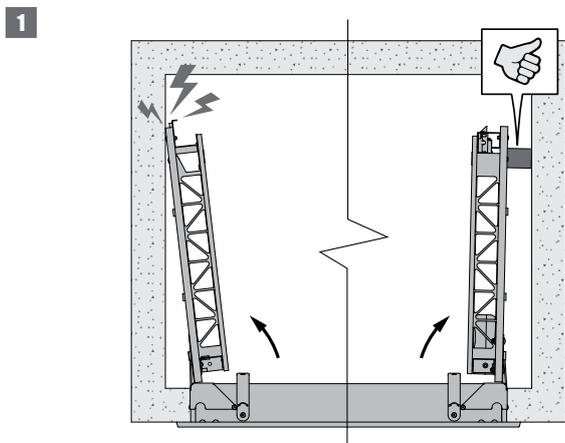

## Position in the shaft

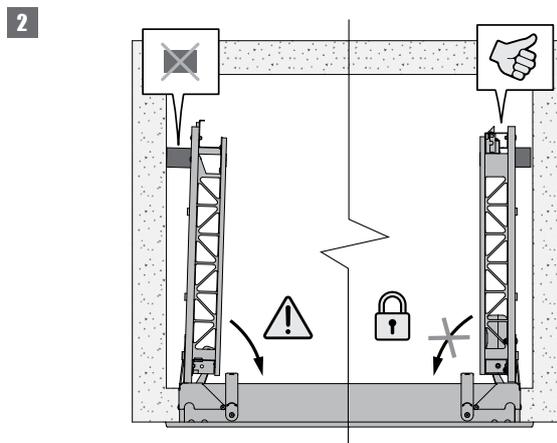

1. The shutter is fixed in the opening. It can be placed either in the shaft, in the axis of the shaft, outside the shaft or the shaft extension or surface-mounted.

## Shock absorbers for the doors

1. Shock absorbers (foam) come standard with the shutter. They can be affixed to the inner face of the door to prevent it from hitting the shaft wall when opening.

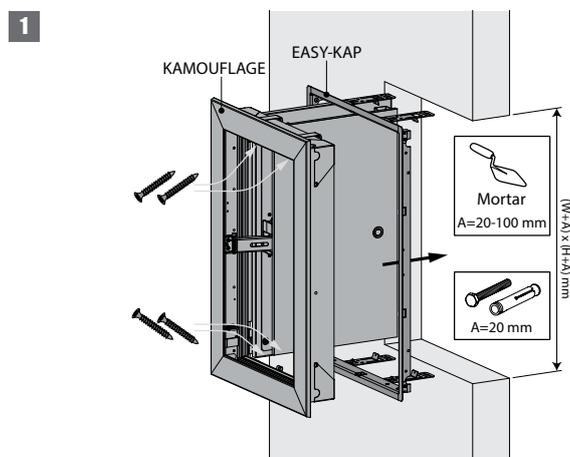

2. Be sure to cut these blocks to the correct dimensions so that the blocking mechanism can engage when the door opens.

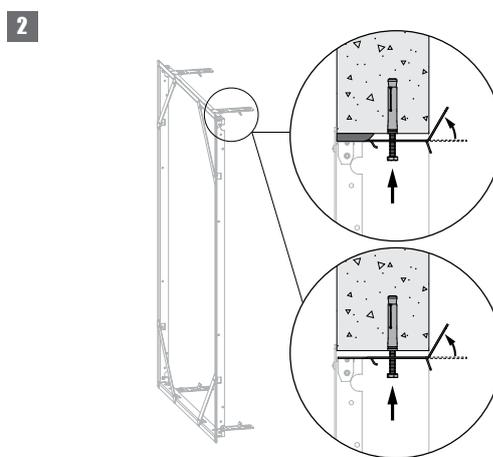

## Installation into vertical concrete shaft with mounting frame

The product was tested and approved in:

| Product        | Range  | Wall type | Classification                              |
|----------------|--|-----------|---|
| Kamouflage 60  | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Concrete ≥ 70 mm                            |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Concrete ≥ 70 mm                            |
| Kamouflage 60  | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Masonry, concrete blocks, concrete ≥ 100 mm |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Masonry, concrete blocks, concrete ≥ 100 mm |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Masonry, concrete blocks, concrete ≥ 100 mm |

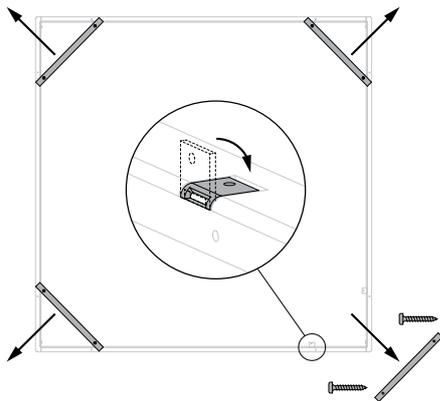

1. In case the mounting frame is screwed:  
Make an opening with dimensions  $(W+20) \times (H+20)$  mm.  
In case the mounting frame is fixed with mortar:  
Make an opening with dimensions  $(W+20) \times (H+20)$  mm till  
 $(W+100) \times (H+100)$  mm.

2. The mounting frame should always be fastened to the concrete shaft with screws and dowels ( $\varnothing 6$  x minimum 60 mm, steel or stainless steel).  
For an opening with dimensions up to  $(W+20) \times (H+20)$  mm:  
Two fixing lugs are provided at the bottom and at the top of the mounting frame: fold these against the shaft and fasten the mounting frame with 4 screws  $\varnothing 6$  x 60 mm, taking care not to misshape it. These screws can be inserted through any of the punched holes in the lugs, depending on the thickness of the shaft wall.  
The finished opening must have the same size as the mounting frame  $(W+10) \times (H+10)$  mm.  
For an opening with dimensions up to  $(W+100) \times (H+100)$  mm:  
Apply mortar around the opening to reduce the opening to the outer dimensions of the frame, then proceed as mentioned above to fasten the frame into the opening. Make sure that the gap between the frame and the opening is sealed completely with mortar.  
The mortar must harden completely before the damper is fastened to the mounting frame.

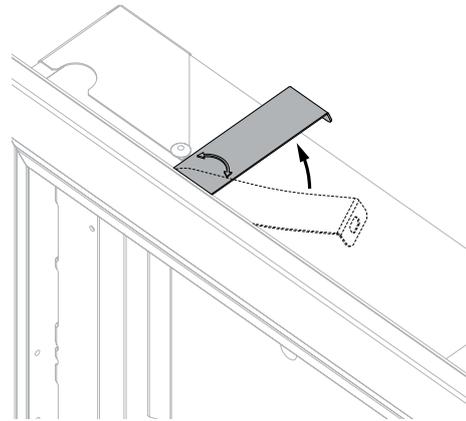

3

3. Put aside the screws that are affixed to one of the cross slats, then unscrew the 4 cross slats of the mounting frame and fold the 8 fastening plates in the frame.

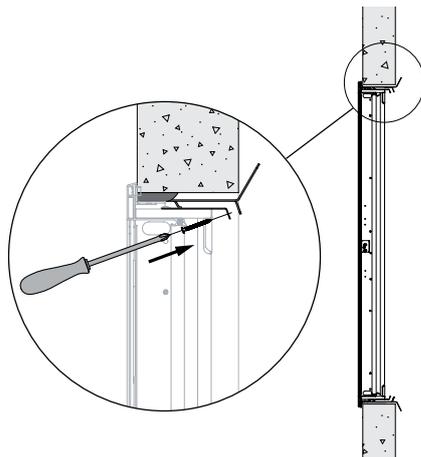

When the EASY-KGC mounting frame is used, unfold the drop-guard grid (90°) in the shaft.

4

4. Rotate the four fastening plates on the damper 90° (to the upright position).

5

5. Open and position the shutter in the mounting frame. If VM magnet: remove the key from the lock to open the shutter.

Fasten the shutter onto the mounting frame with the 4 screws supplied, as shown in the drawing. Tightening the screws pulls the shutter towards the wall until its final position.

You can also slightly correct the angle of the shutter with respect to the mounting frame.

Connect the mechanism according to the wiring diagram.

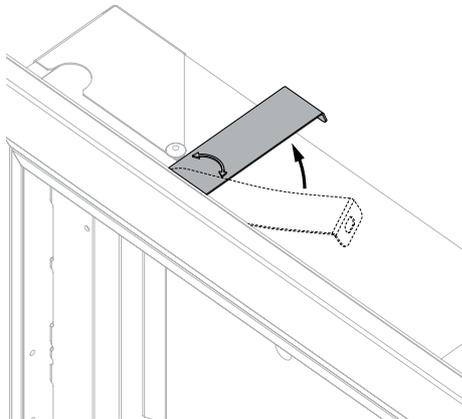

Check the mobility of the shutter.

## Installation into vertical concrete shaft without mounting frame

The product was tested and approved in:

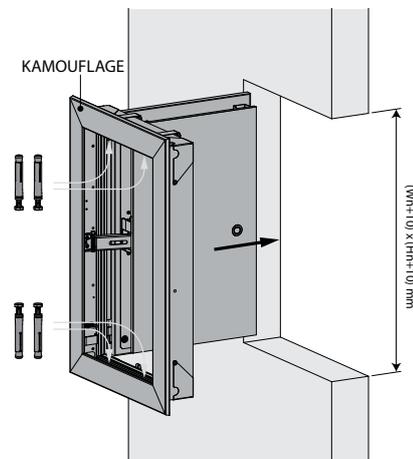

| Product        | Range  | Wall type | Classification                              |
|----------------|--|-----------|---|

| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Masonry, concrete blocks, concrete ≥ 100 mm |

1

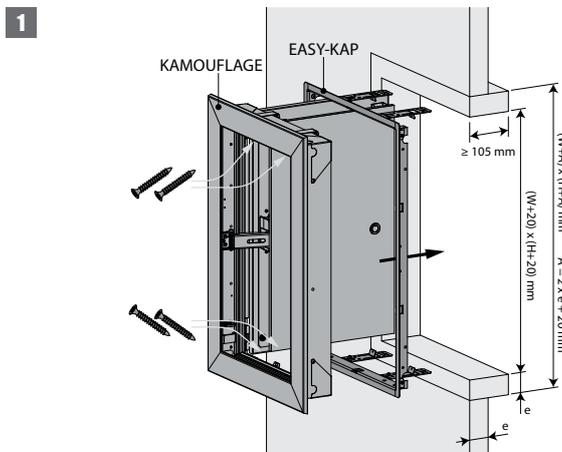

1. Rotate the four fastening plates on the damper 90° (to the upright position).  
The fastening plates are not used for an installation without a mounting frame.

2

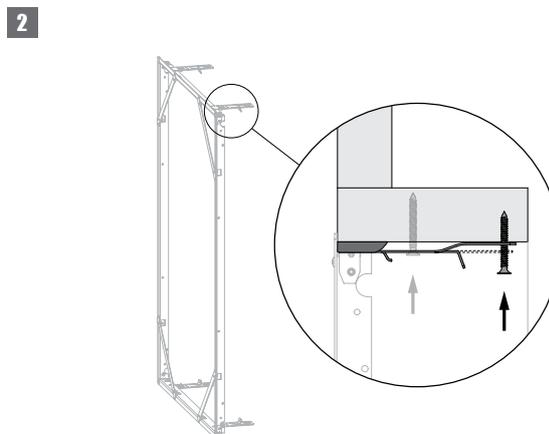

2. Make an opening with dimensions  $(W+10) \times (H+10)$  mm. Open and position the shutter in the opening. If VM magnet: remove the key from the lock to open the shutter. Fix the shutter in the opening using 4 screws and dowels  $\varnothing 6 \times 40$  mm. Connect the mechanism according to the wiring diagram. Check the mobility of the shutter.

## Installation into vertical shaft with built-in mounting frame: general instructions for all types of shafts (other than concrete)

1. Make an opening with dimensions  $(W+A) \times (H+A)$  mm.  $A = 2 \times$  thickness sleeve  $(e) + 20$  mm. Fit a sleeve of the same type and thickness of the duct (thickness  $e$ ) of minimum 105 mm deep in the opening. See details per type of shaft hereafter.

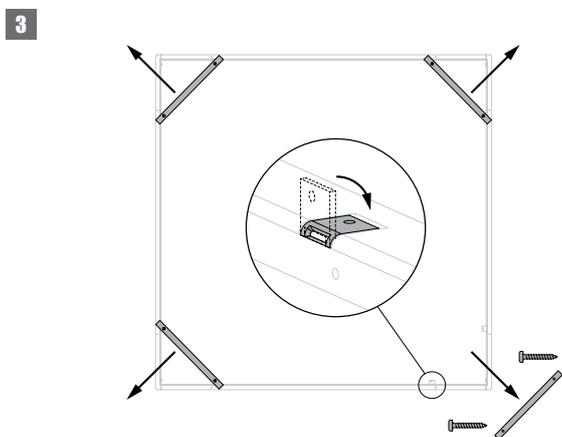

2. Fasten and seal the mounting frame. See details per type of shaft hereafter.

Two fixing lugs are provided at the bottom and at the top of the mounting frame: fold these against the sleeve.

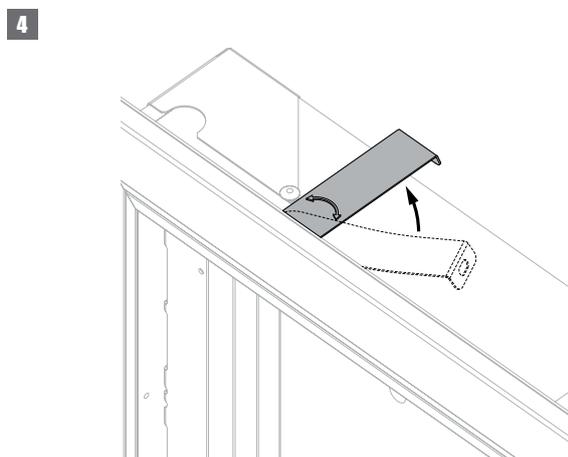

When fixed with screws, fasten the mounting frame to the sleeve with chipboard screws ( $\varnothing 6 \times e$ ) mm. These screws can be fixed in one of the openings provided for this purpose, depending on the depth of the sleeve.

Take care not to misshape the frame during its installation. The finished opening must have the same size as the mounting frame  $(W+10) \times (H+10)$  mm.

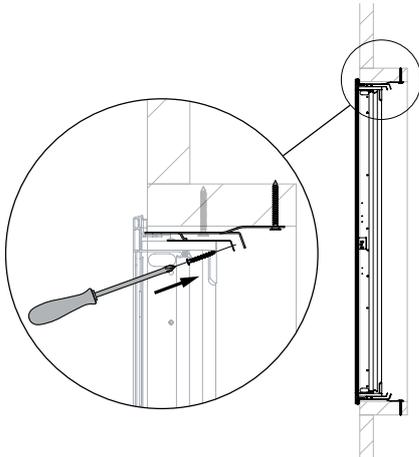

3. Put aside the screws that are affixed to one of the cross slats, then unscrew the 4 cross slats of the mounting frame and fold the 8 fastening plates in the frame.

When the EASY-KGC mounting frame is used, unfold the drop-guard grid ( $90^\circ$ ) in the shaft.

4. Rotate the four fastening plates on the damper  $90^\circ$  (to the upright position).

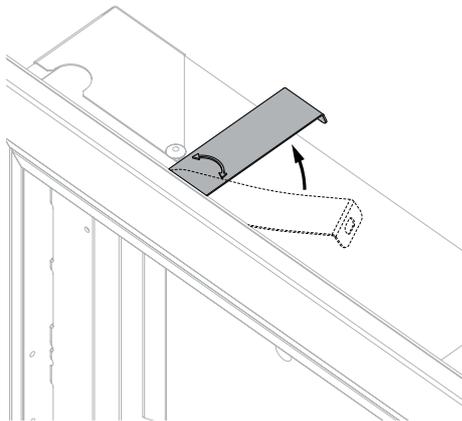

5

5. Open and position the shutter in the mounting frame. If VM magnet: remove the key from the lock to open the shutter. Fasten the shutter onto the mounting frame with the 4 screws supplied, as shown in the drawing. Tightening the screws pulls the shutter towards the wall until its final position. You can also slightly correct the angle of the shutter with respect to the mounting frame. Connect the mechanism according to the wiring diagram. Check the mobility of the shutter.

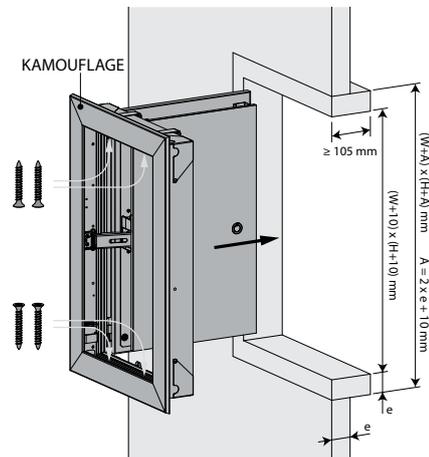

### Installation into vertical shaft (without a mounting frame): general instructions for all types of shafts (other than concrete)

1

1. Rotate the four fastening plates on the damper 90° (to the upright position). The fastening plates are not used for an installation without a mounting frame.

2

2. Make an opening with dimensions  $(W+A) \times (H+A)$  mm.  $A = 2 \times \text{thickness sleeve } (e) + 10$  mm. Fit a sleeve of the same type and thickness of the duct (thickness  $e$ ) of minimum 105 mm deep in the opening. Open and position the shutter in the opening. If VM magnet: remove the key from the lock to open the shutter. Fix the shutter in the opening using 4 screws  $\text{Ø}6 \times 40$  mm.

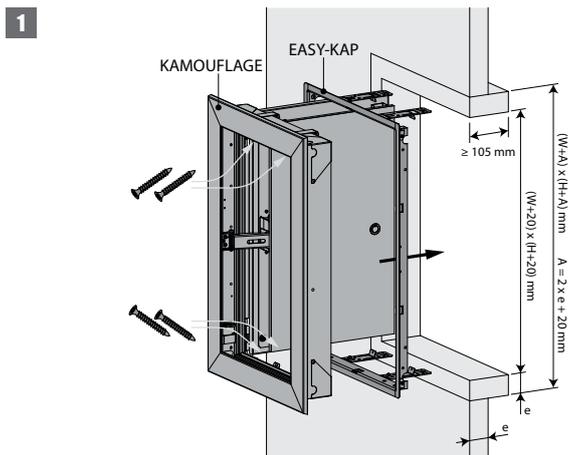

**⚠ Caution:** make sure that the screws don't exceed the sleeve's thickness!

Connect the mechanism according to the wiring diagram. Check the mobility of the shutter.

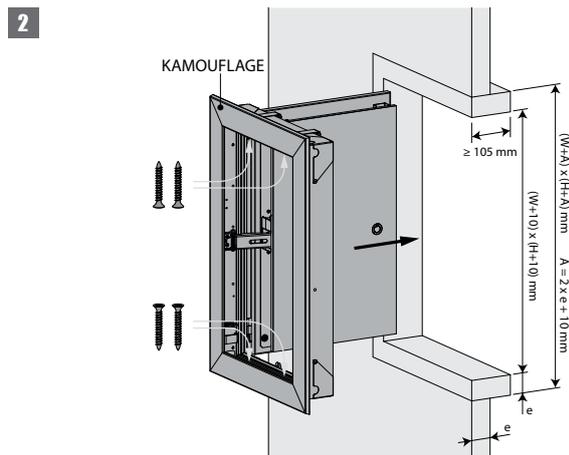

## Installation into vertical shaft PROMATECT L500

The product was tested and approved in:

| Product        | Range  | Wall type |                        | Classification                                 |

1. Installation with mounting frame:  
 Assemble the sleeve with staples and affix the assembled sleeve to the shaft wall with staples.  
 Coat the edges of the opening with adhesive plaster type Promacol S.  
 Seal the mounting frame with Promacol S taking care not to misshape it.

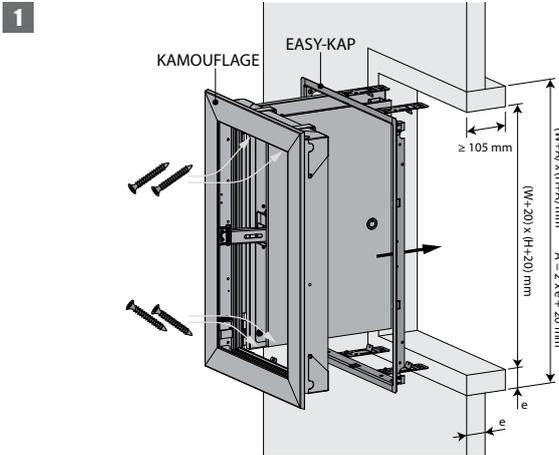

2. Installation without mounting frame:  
 Assemble the sleeve with staples and affix the assembled sleeve to the shaft wall with staples.

### Installation into vertical shaft GEOFLAM (LIGHT) / GEOTEC

The product was tested and approved in:

| Product        | Range  | Wall type |                       | Classification                                 |

#### 1. Installation with mounting frame:

Coat the edges of the opening with adhesive plaster type PLACOL (in case of Geoflam) or GEOCOL (S) (in case of Geotec). In case of Geotec you can also assemble the sleeve with glue and screws  $\varnothing 5 \times (2 \times e)$  mm and affix the assembled sleeve to the shaft wall with glue and screws  $\varnothing 5 \times (2 \times e)$  mm every 100 mm.

Seal the joints between uprights and cross pieces and between the lining and the wall with vegetable fibre caulking and plaster or with GEOCOL (S) (in case of Geotec).

Two fixing lugs are provided at the bottom and at the top of the mounting frame: fold these against the sleeve. Caulk the mounting frame to the duct with vegetable fibre or (in case of Geotec) you can also coat the opening with Geocol (S) and fasten the mounting frame with screws of  $\varnothing 5 \times e$  mm. Take care not to misshape the frame. The finished opening must have the same size as the mounting frame  $(W+10) \times (H+10)$  mm.

#### 2. Installation without mounting frame:

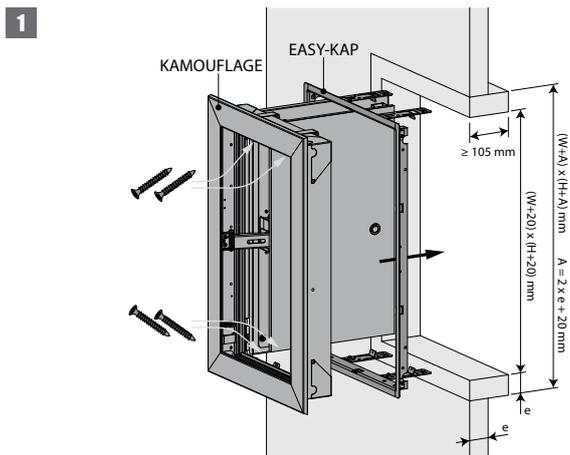

Coat the edges of the opening with adhesive plaster type PLACOL (in case of Geoflam) or GEOCOL (S) (in case of Geotec). Seal the joints between uprights and cross pieces and between the lining and the wall with vegetable fibre caulking and plaster or with GEOCOL (S) (in case of Geotec).

In case of Geotec you can also assemble the sleeve with glue and screws  $\varnothing 5 \times (2 \times e)$  mm and affix the assembled sleeve to the shaft wall with glue and screws  $\varnothing 5 \times (2 \times e)$  mm every 100 mm.

## Installation into vertical shaft TECNIVER

The product was tested and approved in:

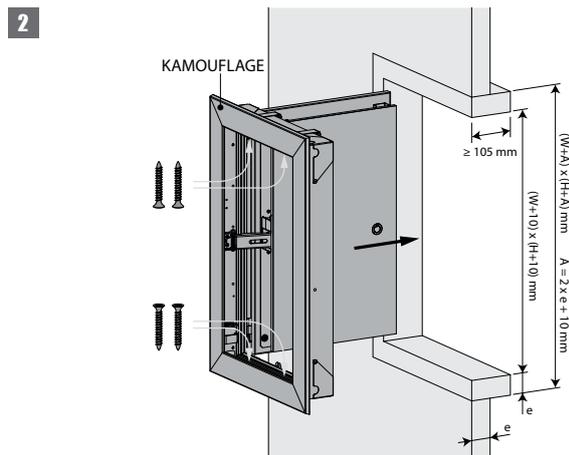

| Product        | Range  | Wall type |                  | Classification                                 |
|----------------|--|-----------|------------------|--|
| Kamouflage 60  | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Tecniver ≥ 35 mm | EI 60 (v <sub>ed</sub> i ↔ o) S 1500 AA multi  |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Tecniver ≥ 45 mm | EI 90 (v <sub>ed</sub> i ↔ o) S 1500 AA multi  |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Tecniver ≥ 50 mm | EI 120 (v <sub>ed</sub> i ↔ o) S 1500 AA multi |

### 1. Installation with mounting frame:

Put glue type CF GLUE on the uprights and cross pieces and between the lining and the wall. Screw the sleeve using chipboard screws Ø5 x 70 mm at 150 mm intervals.

Two fixing lugs are provided at the bottom and at the top of the mounting frame: fold these against the sleeve. First coat the opening with glue CF GLUE. Glue the mounting frame to the lining taking care not to misshape it. The finished opening must have the same size as the mounting frame (W+10) x (H+10) mm.

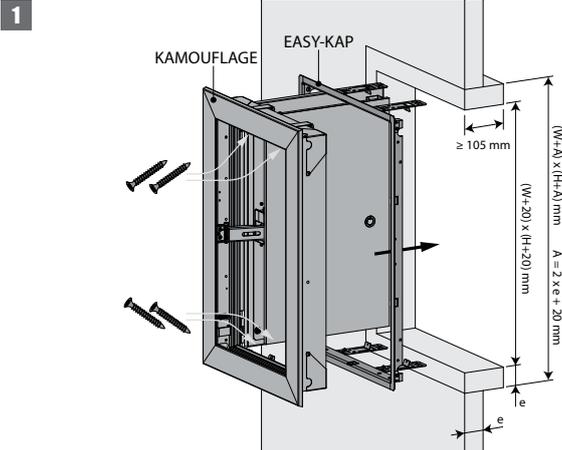

### 2. Installation without mounting frame:

Put glue type CF GLUE on the uprights and cross pieces and between the lining and the wall. Screw the sleeve using chipboard screws Ø5 x 70 mm at 150 mm intervals.

## Installation into vertical shaft GLASROC F V500

The product was tested and approved in:

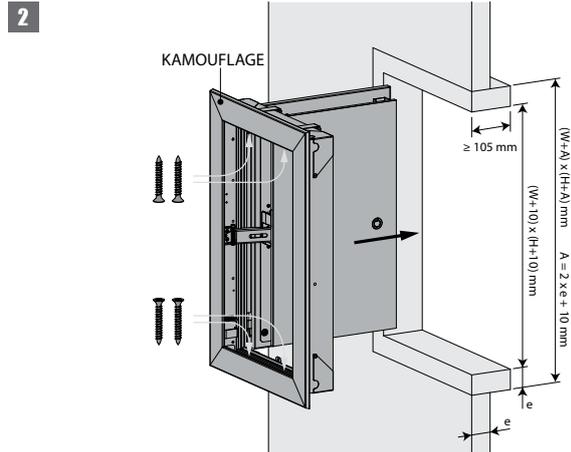

| Product        | Range  | Wall type |                        | Classification                                 |
|----------------|--|-----------|------------------------|--|
| Kamouflage 60  | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Glasroc F V500 ≥ 35 mm | EI 60 (v <sub>ed</sub> i ↔ o) S 1500 AA multi  |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Glasroc F V500 ≥ 50 mm | EI 120 (v <sub>ed</sub> i ↔ o) S 1500 AA multi |

### 1. Installation with mounting frame:

Put glue type GLASROC F V500 on the uprights and cross pieces and between the lining and the wall. Screw the sleeve using chipboard screws Ø5 x 70 mm at 150 mm intervals.

Two fixing lugs are provided at the bottom and at the top of the mounting frame: fold these against the sleeve. First coat the opening with glue GLASROC F V500. Glue the mounting frame to the lining taking care not to misshape it. The finished opening must have the same size as the mounting frame (W+10) x (H+10) mm.

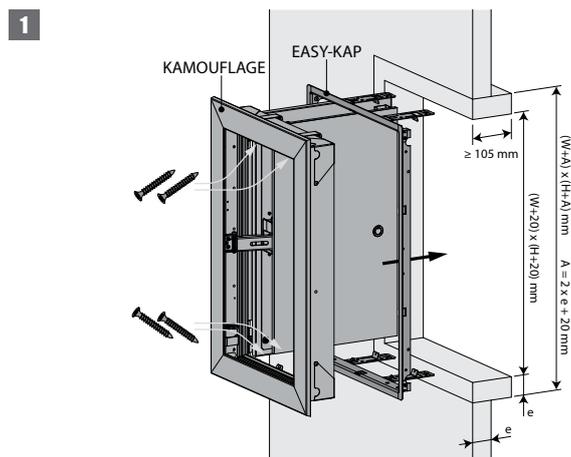

### 2. Installation without mounting frame:

Put glue type GLASROC F V500 on the uprights and cross pieces and between the lining and the wall. Screw the sleeve using chipboard screws Ø5 x 70 mm at 150 mm intervals.

## Installation into vertical shaft EXTHAMAT

The product was tested and approved in:

| Product        | Range  | Wall type |                  | Classification                                 |
|----------------|--|-----------|------------------|--|
| Kamouflage 60  | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Exthamat ≥ 25 mm | EI 60 (v <sub>ed</sub> i ↔ o) S 1500 AA multi  |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Exthamat ≥ 30 mm | EI 90 (v <sub>ed</sub> i ↔ o) S 1500 AA multi  |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Exthamat ≥ 35 mm | EI 120 (v <sub>ed</sub> i ↔ o) S 1500 AA multi |

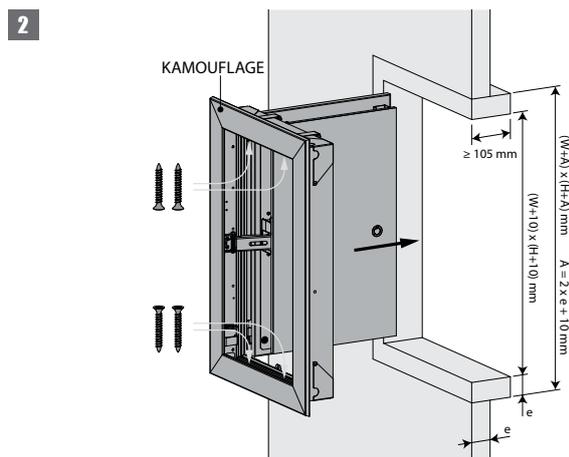

### 1. Installation with mounting frame:

Coat the edges of the opening with adhesive plaster.

Seal the joints between uprights and cross pieces and between the lining and the wall with vegetable fibre caulking and plaster.

Two fixing lugs are provided at the bottom and at the top of the mounting frame: fold these against the sleeve. Caulk the mounting frame to the duct with vegetable fiber caulking and plaster and taking care not to misshape it. The finished opening must have the same size as the mounting frame (W+10) x (H+10) mm.

### 2. Installation without mounting frame:

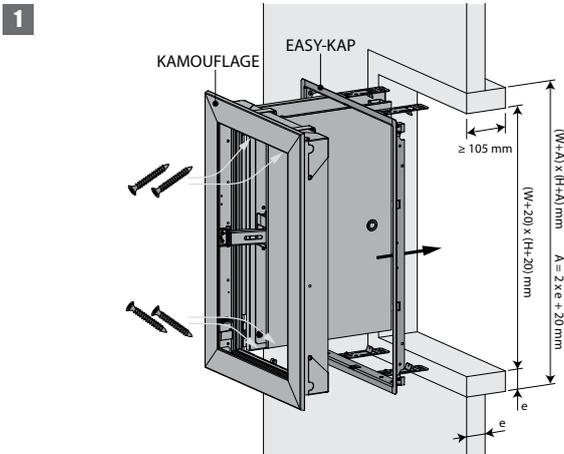

Coat the edges of the opening with adhesive plaster.

Seal the joints between uprights and cross pieces and between the lining and the wall with vegetable fibre caulking and plaster.

## Installation into vertical shaft DESENFIRE (HD/THD/STR)

The product was tested and approved in:

| Product        | Range  | Wall type |                       | Classification                                 |
|----------------|--|-----------|-----------------------|--|
| Kamouflage 60  | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Desenfire HD ≥ 25 mm  | EI 60 (v <sub>ed</sub> i ↔ o) S 1500 AA multi  |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Desenfire THD ≥ 25 mm | EI 90 (v <sub>ed</sub> i ↔ o) S 1500 AA multi  |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Desenfire HD ≥ 35 mm  | EI 120 (v <sub>ed</sub> i ↔ o) S 1500 AA multi |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Desenfire ≥ 45 mm     | EI 120 (v <sub>ed</sub> i ↔ o) S 1500 AA multi |
| Kamouflage 120 | 300x385 mm ≤ Kamouflage 1V ≤ 700x1075 mm;<br>350x385 mm ≤ Kamouflage 2V ≤ 1100x1105 mm | Shaft     | Desenfire STR ≥ 25 mm | EI 120 (v <sub>ed</sub> i ↔ o) S 1500 AA multi |

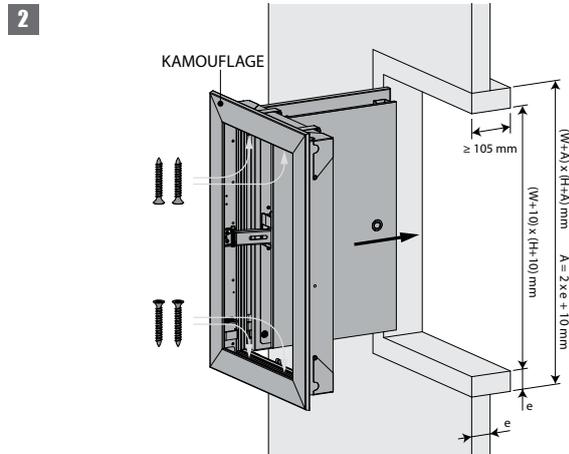

### 1. Installation with mounting frame:

Coat the edges of the opening with adhesive plaster, type FACILIS.

Seal the joints between uprights and cross pieces and between the lining and the wall with vegetable fibre caulking and plaster.

Two fixing lugs are provided at the bottom and at the top of the mounting frame: fold these against the sleeve. Caulk the mounting frame to the duct with vegetable fiber caulking and plaster and taking care not to misshape it. The finished opening must have the same size as the mounting frame (W+10) x (H+10) mm.

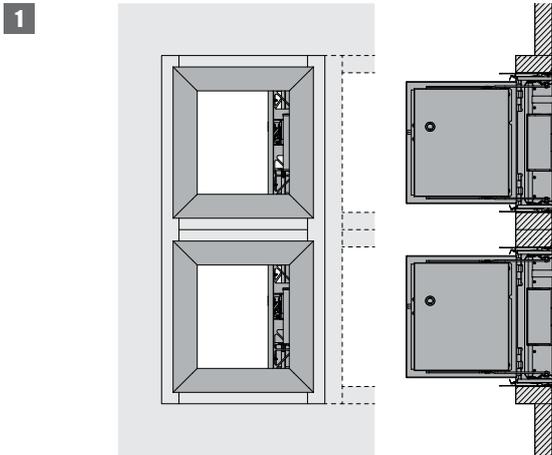

### 2. Installation without mounting frame:

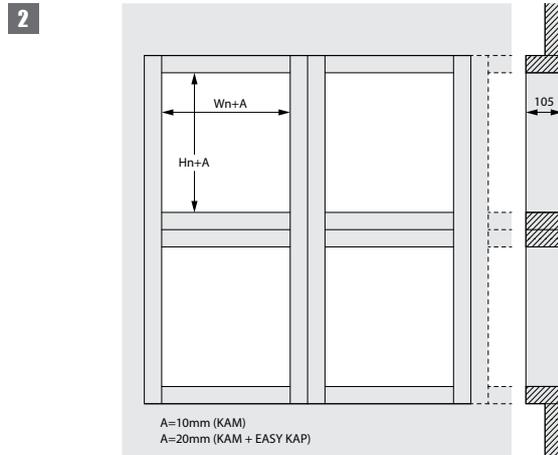

Coat the edges of the opening with adhesive plaster, type FACILIS.

Seal the joints between uprights and cross pieces and between the lining and the wall with vegetable fibre caulking and plaster.

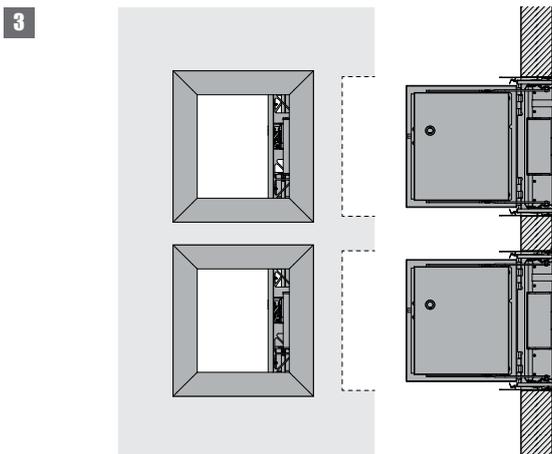

## Installation at minimal distances

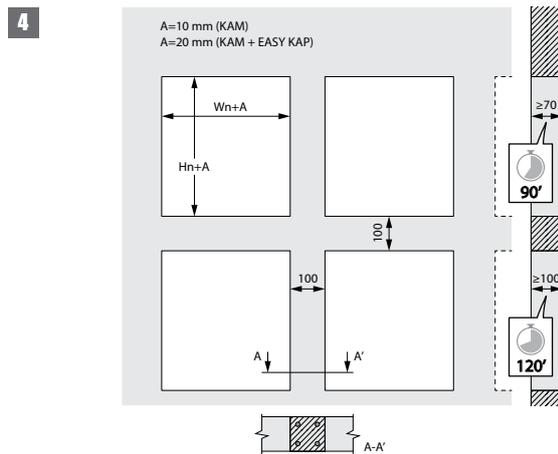

1. The shutters can be installed at minimal distance on top of or next to each other, if they are mounted in separate sleeves made from the shaft material with the required fire resistance. It is advised not to exceed a 2 x 4 configuration (H x W).

2. In case several shutters are mounted at a minimal distance, the bearing and reinforcement points of the shaft must be adjusted in proportion to the increased weight. The installation of the shaft must comply with the classification report delivered by the shaft manufacturer.

3. When mounting in a concrete shaft, you need to provide a continuous reinforcement in the vertical columns of at least 4 x Ø 8 mm.

A=10 mm (KAM)  
A=20 mm (KAM + EASY KAP)

## Finishing

1

1. The upper face of the shutter consists of a sheet of plasterboard, which you can decorate to match the wall in which the shutter is installed (paint or wallpaper).

A coat of paint can be applied on the unexposed face of the shutter and the frame; wallpaper can be applied to the shutter. Covering plate of plasterboard: fill the holes of the screws with a suitable filler. Let it dry and sand. Apply a primer paint suitable for plasterboard.

Profile of anodised aluminium: apply a primer suitable for metal. With the option PRIM, the frame is already prepared with a primer, ready to be painted.

Once the primer is dry, proceed with the finishing (paint or wallpaper).

**⚠ Caution :** don't fill / cover the joint between the covering plate and the aluminium profile in order to guarantee that the shutter can open.

The options ATOUT RAL9010 / ALU (ALU not available on ceiling (P) model) and PRIM facilitate the finishing phase. With option ATOUT RAL9010 / ALU the shutter is supplied with a finished aspect, laquered white or aluminium. With option PRIM the profile is pre-painted with a primer.

## Maintenance

- No specific maintenance required.
- Schedule at least two running visual checks each year.
- Remove dust and all other particles before start-up.
- Follow the local maintenance regulations (i.e. BS9999 Annex V; NF S 61-933) and EN13306.

## Operation and mechanisms

### Operation: general points

- See under 'Installation'.
- ▲ Caution : please note dampers must be fully open before starting supply and/or extract fans.

### VA MEC Remote controlled unlocking by a magnet.

Remote controlled unlocking by an electric impulse (VD) or by interruption (VM) of the magnet's power supply.

### Options - at the time of order

|      |   |
|------|---|
| VD24 | Natural magnet 24 V DC                                    |
| VD48 | Natural magnet 48 V DC                                    |
| VM24 | Electromagnet 24 V DC (not applicable for ME and H model) |
| VM48 | Electromagnet 48 V DC (not applicable for ME and H model) |
| FDCU | Limit switch 'open/closed' (Incl. exc. for H model)       |
| FDCB | Auxiliary limit switch 'open/closed'                      |

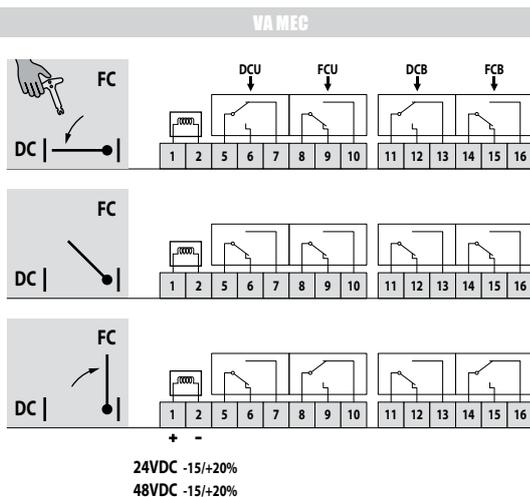

### Unlocking

- **manual unlocking:** with the key (delivered in the bag together with the installation guidelines)
- **automatic unlocking:** n/a
- **remote unlocking:** by electrical impulse (VD) or interruption (VM) of current to the magnet.

### Resetting

- **manual resetting:** with the key (delivered in the bag together with the installation guidelines)

## Electrical connection

DC : Switch closed position smoke evacuation shutter  
 FC : Switch open position smoke evacuation shutter

| KAMOUFFLAGE | 1V | 120 | 400 685 | VD24 | FDCB | ATO | OUT RAL 9010 |
| 1           | 2  | 3   | 4       | 5    | 6    | 7   |              |

1. product
2. 1 shutter (1V) / 2 shutters (2V)
3. fire resistance of 60 or 120 minutes
4. width
5. height
6. option: type magnet and voltage
7. option: bipolar end of range switch (FDCU included)
8. option: frame painted white, shutter covered with white metallic sheet

## Approvals and certificates

All our products are submitted to a number of tests by official test institutes. Reports of these tests form the basis for the approvals of the products.
