### PRODUCT FEATURES

Control of one smoke control damper actuator	ZENiX 1SDST is used for controlling one 24 V smoke damper actuator with ST-plug. The unit is connected to the ZENiX controller module via a 4 wire bus communication.
Connection	The ST actuators are equipped with plug connectors that can be plugged directly into the ZENiX 1SDST unit.
Isolation	The actuator is isolated from mains by a transformer.
Predefined address	Each unit has a predefined address, no addressing required.
Work without 230 V	ZENiX 1SDST unit is able to work without 230 V: it will only send data about actuator position to the ZENiX controller and will not be able to change the position of the smoke damper.
